## ABOUT THE JOURNAL

Research-Kërkime is a scientific journal that belongs to the Academy of Sciences and Arts of Kosova, the Section of Natural Sciences. The journal provides original articles, reviews and short communications covering natural and applied sciences.

Journal covers Natural and Applied Sciences specified in series A, B etc. Articles are to be presented in English with summary in Albanian.

Manuscript must be send at the following e-mail address: [research@ashak.org](mailto:research@ashak.org)

The authors are recommended to follow the formal standards of the journal that are given in the document, named Instructions to authors, that can be downloaded.

Manuscripts received until the 15<sup>th</sup> September 2018 will be taken under consideration for this number.

## EDITORIAL BOARD

Editor-in-Chief:

[Salih Gashi](#), Kosova Academy of Sciences and Arts

Str. "Agim Ramadani" No. 305, 10 000 Prishtina, Republic of Kosova

## INSTRUCTIONS TO AUTHORS

The scope and the broadness of the journal:

Research-Kërkime is a scientific journal that belongs to the Academy of Sciences and Arts of Kosovo. It is an open access journal that provides original articles, reviews and short communications covering natural and applied sciences. The reviews or tutorial papers which disseminate the progress in these areas are also accepted at the invitation of the Editorial Board if the author himself has actively contributed to the progress in that field. Manuscripts that are original papers and reviews should not exceed the length of 5000 and 9000 words respectively.

Journal covers Natural and Applied Sciences specified in series A, B etc. Articles are to be presented in English with summary in Albanian.

Reviewing procedure:

The reviewing process is done by the peer reviewer single blind method. The Editorial Board will contact competent reviewers according to the discipline that the scientific work is made. The authors may suggest two referees closely related to their investigated research topic. The choice of the competent reviewers is of crucial importance. Once the reviewer's reports that include remarks and the recommendations are made, the Editorial Board will send them to the authors. Papers with favorable recommendations will be considered for publication.

Taking into the account that the journal Research-Kërkime covers many disciplines and a wider audience, the style of the writing differs to that of specialized journals. The articles should be written in English and if this is not the author's native language the paper should be reviewed for its correct English once it obtains a positive recommendation for the publication.

Guide for authors:

A completed manuscript received by mail may contain the following files:

The manuscript, a cover letter to the Editor and eventually the Supporting Information.

Declaration of submission:

The author/s declares that the submitted work has never been published before and that it is not under consideration at another journal. The names of the authors and the author order cannot be changed after the acceptance of the paper.

Ethics of publishing:

The main obligation for the author/s is to give original data and to make an objective explanation of the results and their impact. The authors are entirely responsible for the content of their scientific contributions. The submitted paper should have not been previously published; it is not under consideration at another journal. The author should cite the scientific papers that have paved the route for the progress during the reported work and are essential for understanding of the phenomena.

The co-authors of a paper must be individuals that have contributed scientifically to the paper progress and are responsible for the results. The small contributions are indicated at Acknowledgments section.

Plagiarism is forbidden so the authors should avoid the copying and very close paraphrasing of text and works of another's person or the self-plagiarism. For this reason the correct citations throughout the paper are of crucial importance for the readers to know the source of information.

#### Paper structure:

The manuscript should be submitted in the electronic version. It includes the title of the paper, the authors, their affiliation addresses, key words, introduction, experimental part, results and discussions, conclusion, acknowledgments and references.

Original papers may have at the maximum 5000 words or the equivalent space in figures, formulas and tables. Each figure and table is counted 200 words. The text of the paper is written in Word, using the format Times New Roman, 12.

Title of the paper: It must be brief, clear, succinct, and related to the content of the manuscript. The use of abbreviations, formulae and other symbols is not recommended.

Author's names and their affiliation addresses. List the name and surname of all authors with their complete affiliation addresses. The name of the corresponding author should be identified by an asterisk and must include an e-mail address.

Abstract: It should give brief information about the novelty of the paper and make mention of methods and main results.

Introduction: It describes in details the scientific problem that is studied in the manuscript and gives relevant arguments about the importance of the results to the field that belongs to. The introduction contains also the main results that have already been achieved within the field.

The experimental section should represent clearly all procedures, materials and methods that are used to perform experimental work the results of which are given and discussed in the text of the research article. The theoretical calculations, the methods and software used should be given in the case of theoretical work. Well-known procedures can be described briefly and for more details readers are advised to see already published papers. The experimental results or theoretical calculations must contain sufficient data to enable other researchers to repeat them.

Results and discussions. The results throughout the manuscript must be original, well presented and not repeated. Their discussion must take into account their importance for the topic and their comparison with the similar works if they have been already made within the discipline.

Figures and Tables. The figures are joined with their captions. The tables are submitted as editable text. Figures and tables are inserted in the text and the information that presents the figure should not repeat the table.

Symbols, formulae and equations are written according to IUPAC rules and recommendations while for units SI is taken in account. For math formulae Mathematical editor is used.

Conclusions. A summary of the main results is given at the end of the paper.

Acknowledgments. People that have provided any kind of assistance during the manuscript preparation may be acknowledged.

References. They are given at the end of the paper and numbered in the order in which they are first mentioned in the text. They are not condensed and are individually numbered. Unpublished references and references from journals outside Scimago platform are not accepted. Self-citations are limited at 30 % of the total of references.

Reference format: Authors surname and the name initials, the title of the paper, abbreviations of the scientific journal, the year, the volume and the paper pages.

The list of references should follow the main text and should have the following format (ACS style):

For a paper in a Journal:

Brisset, F.; Vieillard, J.; Berton, B.; Morin-Grognet, S.; Duclairoir-Poc, C. and Le Derf, F. Surface functionalization of cyclic olefin copolymer with aryldiazonium salts: A covalent grafting method. *Appl. Surf. Sci.* **2015**, 329, 337–346.

For a book:

1. Atkins, P. and di Paula, J. *Elements of Physical Chemistry*, Oxford University Press, Oxford, **2016**, p.122.
